

VAUCHER MANUFACTURE FLEURIER CALIBRE SEED VMF 5500

A NEW EXTRA-THIN AUTOMATIC CALIBRE

With the Seed VMF 5500, Vaucher Manufacture Fleurier pushes the boundaries of horological finesse without compromising on performance.

Available from just 25 pieces, this new micro-rotor automatic calibre adapts to every ambition, with no compromise on quality. At just 2.60 mm thick without date function (3.00 mm with date) and with a 65-hour power reserve, the Seed VMF 5500 family stands as one of the thinnest industrialised calibres on the market.

Its variable-inertia balance wheel with gold inertia blocks and 3 Hz frequency ensure stable, reliable timekeeping. The movement is 100% lead-free.

Certified for 10 years. Warranted for 8. At Vaucher Manufacture Fleurier, reliability is measured, not promised. The Seed VMF 5500 undergoes a rigorous testing protocol for its 10-year qualification and certification, and is subject to demanding quality controls throughout the entire manufacturing process. For brands, it is the assurance of building on a proven movement, designed to last.

Every calibre can become your own. Dial-side and bridge-side finishes are entirely customisable to the highest standards of Haute Horlogerie: Côtes de Genève, diamond-polished bevelling, circular graining, perlage, two-tone laser engraving. Ideal for skeletonisation, available in titanium, and compatible with additional complications (moon phase, perpetual calendar). Every detail can be reimagined so the movement tells your story.

The Calibre Seed VMF 5500: 2.60 mm thick, 65 hours of power reserve, 100% customisable and backed by an 8-year warranty.

Available from as few as 25 pieces. Discover this new calibre from 16 to 19 June 2026 at EPHJ in Palexpo Geneva.
